9. Butterflies have no noses; they smell and taste through their feet and antennae.

True X False

Trivia quiz: Butterfly Beauties

10. Butterflies have compound eyes that give them outstanding vision.

True ____ False ____

Trivia quiz: Butterfly Beauties

10. Butterflies have compound eyes that give them outstanding vision.

True ___ False X

Butterflies are nearsighted, but they *can* see ultraviolet light which puts them a step ahead of humans.

What do butterflies eat?

A butterfly's diet consists of nectar from flowers which it drinks using its proboscis, an elongated sucking mouthpart that is tubular and flexible.

Because butterflies can taste with their feet, they often choose where to lay the eggs that will become caterpillars on the basis of how the leaf they have landed on tastes. Will the young caterpillars like it?

An Irish Blessing

May the wings of the butterfly kiss the sun
And find your shoulder to light on,
To bring you luck, happiness and riches
Today, tomorrow and beyond.
